(b) the amount of any State Financial Support which had not been disbursed to BIAL as at the Airport Opening Date.

Provided however that the amount to be refunded shall not exceed the State Financial Support actually disbursed to BIAL as at the Airport Opening Date.

(ii) For the purpose of determining the Actual Project Cost, the amounts relating to any items of the Project Cost, including interest during construction, shall be reckoned only for the period up to the Airport Opening Date. A proper accounting system and accounting policy will be put in place by BIAL so that the Project Cost and operating costs after the Airport Opening Date are accounted for separately to ensure timely and accurate reconciliation of the Actual Project Cost with the Project Cost. The statutory auditors of BIAL will certify such reconciliation. GoK may appoint a reputed independent consultant/audit firm to verify and confirm, to GoK’s satisfaction, the reconciliation done by the statutory auditors of BIAL.

(iii) It is expressly clarified that

(a) if there is any relaxation in or reduction of or refund of import/customs duties by GoI (compared to the duty reflected in the project cost statement of the Financial Model), such relaxation/reduction/refund will lead to a corresponding reduction in or refund of the State Financial Support; and / or

(b) if and when any monies are made available to BIAL out of the advance development fee proposed to be imposed by M1, then such monies shall be adjusted by way of either a reduction or refund of the State Financial Support.

Upon the occurrence of the event(s) contemplated in Clause 3.7(iii) (a) and / or (b), the mechanism for the reduction / refund of the State Financial Support referred to therein shall be mutually agreed between the Parties within 120 days after Airport Opening Date.

(iv) The refund of the State Financial Support in accordance with Clause 3.7 (i) above shall be independent of and shall not affect the obligations of GoK to subsequently make disbursements of State Financial Support in accordance with Clause 3.5.1 (iv) and
Clause 3.5.2(iv) above in respect of any disputes with the EPC Contractors.

3.8 Refund of State Financial Support upon termination of Concession Agreement

3.9.5 Subject only to the provisions of Clause 3.9.6 below, in the event the sum of the Third Party Liabilities, the Set Aside Amount and the SSA Outstanding Amount is more than the Settlement Amount received by
BIAL from GoK, the obligation of BIAL to repay the SSA Outstanding Amount shall stand reduced to such amount as is available with BIAL after the payment of Third-Party Liabilities' and after adjustment of the Set Aside Amount. The repayment shall be made simultaneously with the payment of the Settlement Amount by GoK.

3.9.6 If upon the liquidation of BIAL following the transfer of the Airport under the provisions of this Agreement, any additional funds become available for distribution after all the other remaining liabilities, if any, have been met, then such residual funds will also become payable towards the State financial Support, if any, to the extent that it could not be repaid due to the application of Clause 3.9.5.

3.10 Repayment

3.10.1 Subject to Clauses 3.8, 3.9 or 3.10.3, as the case may be, BIAL shall pay Repayment Instalments in reduction of the aggregate of outstanding amounts under the State Financial Support in accordance with the terms of Schedule 10.

3.10.2 BIAL shall not reborrow any part of the State Financial Support which has been repaid.

3.10.3 Notwithstanding the provisions of Clause 3.10.1, if the cash position of BIAL, after taking into account its business obligations, provisioning for statutory reserves, dividends, approved Expansion and meeting of Debt service obligation, is surplus, then BIAL will use such surplus for earlier/accelerated repayment of the outstanding State Financial Support and/or specific bullet repayments on a year to year basis.

3.11 Interest

No interest shall be payable by BIAL on the outstanding amounts of the State Financial Support paid to BIAL pursuant to this Clause 3. Provided, however, that interest shall be paid on delayed repayment of instalments, as per Clause 36 hereof.

ILLUSTRATION: If the Settlement Amount received is Rs. 100 crores, the Third Party Liabilities are Rs. 40 crores, the Set Aside Amount is Rs. 30 crores and the Outstanding State Support is Rs. 60 crores, the State Support repayable shall stand reduced to Rs. 30 crores.

GoK shall provide such consent to BIAL within a period of one (1) year from the date on which an application is made to GoK, which date shall not be prior to the application made to GoI seeking its approval under Article 7.2 of the Concession Agreement. To the extent that GoK fails to give such consent within such one (1) year period, BIAL will be deemed to have received such consent from GoK. affected users of the Airport such prior written notice thereof as the DGCA may
from time to time reasonably require.

7.2 [Intentionally Left Blank]

7.3.1 Subject to installing appropriate facilities and compliance with Applicable
Law, BIAL shall be entitled and obliged to operate the Airport and to permit

by any Relevant Authority to provide a Reserved Activity.

Agreement either Party anticipates that BIAL will not be able to operate
the Airport during both day and night hours, it shall notify the other Party
as soon as reasonably practicable of the reasons for the same and the
measures that BIAL is implementing or intending to implement the
provisions of Clause 7.3.1.

experience is a result of a number of bodies interacting in order to provide various
services and facilities. BIAL is primarily responsible for the provision of services at
the Airport and shall work to improve the facilities, standards and services at the
Airport.

7.5 Performance Standards

7.5.1 Throughout the term of this Agreement the Airport's performance shall be
monitored by passenger surveys in accordance with this Clause 7. The

criteria as may be mutually agreed upon from time to time (the
"Standards"): 

[Signature]
7.5.2 BIAL shall participate in IATA surveys and shall ensure that a survey is conducted each year in accordance with IATA's requirements to determine the Airport's performance. The first such survey shall be conducted during the third (3rd) year after Airport Opening.

7.5.3 If three consecutive surveys show that the Airport is consistently rated in respect of the service standards under BIAL's direct control, as lower than IATA rating of three and a half (3.5) (in the current IATA scale of 1 to 5), BIAL will produce an action plan in order to improve the Airport's performance which must be implemented within one (1) year.

7.5.4 If the Airport continues for a further one (1) year to be rated as lower than IATA rating of three and a half (3.5) (in the current IATA scale of 1 to 5) in respect of the service standards under BIAL's direct control, the GoK may direct BIAL to produce a further action plan to improve the Airport's performance which must be implemented within one (1) year. Should BIAL fail to produce such an action plan or if the Airport continues to be rated as lower than three and a half (3.5) in respect of the service standards under BIAL's direct control, in the survey conducted in respect of the year after implementation of such action plan, GoK shall have the right to seek the termination of the services of the Airport operation and management services provider and BIAL shall forthwith replace the Airport operation and management services provider.

7.5.5 If the Airport continues to be rated as lower than three and a half (3.5) (in the current IATA scale of 1 to 5) in respect of the service standards under BIAL's direct control due to BIAL's poor performance, in the survey conducted in respect of the two (2) years after replacement of the Airport operator, GoK shall be entitled to exercise its rights under Clause 19.1 hereof.

7.5.6 In the event that the current IATA scale changes, the Parties agree that equivalent levels of ratings contemplated in this Clause 7.5 shall be applied. BIAL would make best endeavours to achieve performance standards higher than three and a half (3.5) (in the current IATA scale of 1 to 5).

7.6.1 From the date the IRA has power to review, monitor and set standards and penalties and regulate any such related activities at the Airport, BIAL shall be required, instead of the provisions of Clauses 7.5.1 to 7.5.6, to comply with all such regulations framed by IRA.

7.5.8 Without prejudice to BIAL's obligations under Clause 7.5.1 to 7.5.7 above, if at any time during the term of this Agreement BIAL reasonably anticipates that it shall be unable to comply with the provisions of this Clause 7.5 it shall notify GoK of the same and the measures that it is implementing or intending to implement to ensure compliance with this Clause 7.5. If at any time during the term of this Agreement BIAL fails to
comply with the Standards, BIAL shall keep GoK apprised, on a quarterly basis of the measures it is taking to remedy such non-compliance.

7.5.9 Notwithstanding anything contained in Clauses 7.5.3 to 7.5.6 above, in the event GoI concludes concession agreement(s) in respect of any other Major Airport(s) with 3.5 as the rating for the purposes of termination of the Concession Agreement by GoI, then the rating for the purposes of this Clause 7 shall continue to be 3.5. However, in the event GoI concludes concession agreement(s) in respect of any other Major Airport(s) with ratings lower than 3.5 an not lower than 3 as the rating for the purposes of termination of the concession agreement by Gal, then such lower rating shall be made applicable for this Clause 7.

BIAL shall not be in breach of its obligations under this Clause 8.1 if, in the opinion of the Insurance Advisor, which opinion has taken into consideration all consequential implications on BIAL (and brought to the notice of BIAL): 

(i) any of the insurances and/or reinsurances required to be taken out or maintained are not available to BIAL on reasonable commercial terms in the international insurance or reinsurance market; or
the premia in respect of any such insurances are unreasonable, having regard to the risks being covered.

Any dispute or difference between the Parties in respect of the determination by the Insurance Advisor on the matters referred to in (i) and (ii) above shall be settled in accordance with the procedure set out in Clause 33;

8.2 Additional Insurances

8.2.1 BIAL shall ensure that each policy taken out pursuant to Clauses 8.1(i) and 8.1(ii) shall be increased from time to time

(i) to such amounts (and with such deductibles) as would be effected by an airport operator in India acting in accordance with Good Industry Practice, and in each case which does not self-insure (except by means of minimum deductibles required by insurers generally); and

(ii) such amounts and with such deductibles as may be reasonably required, taking into account, amongst other things, market availability in respect of risks, liabilities and amounts of insurance and the financial position of BIAL.

8.2.2 Without prejudice to the other provisions of this Clause 8, BIAL shall:

(i) from time to time effect and maintain in full force those insurances which it is required to have by any Applicable Law or by the terms of any contract entered into by it in respect of the Airport; and

(ii) use all reasonable efforts to effect and maintain in full force those insurances which it is required to have by the terms of any other contract to which it is at any time a party.

Within 15 (fifteen) days of receiving any insurance policy certificates in respect of Insurances required to be obtained and maintained under Clauses 8.1 and 8.2, BIAL shall furnish to GoK copies of such policy certificates, copies of the insurance policies and evidence that the insurance premia have been paid in respect of such insurance. No insurance shall be cancelled, modified or allowed to expire or lapse until the expiration of at least forty-five (45) days notice of such cancellation, modification or non-renewal has been provided by BIAL to GoK.

8.4 Remedy for failure to insure

If BIAL shall fail to effect and keep in force all insurances for which it is responsible pursuant hereto, GoK shall have the option to keep in force such insurances, and pay such premia and recover the costs thereof from BIAL.
8.5 Information
BIAL shall notify GoK as soon as reasonably practicable after it becomes aware of any occurrence which may entitle any person to submit a claim in excess of US$ 1 million or the equivalent in any other currency under any of the policies required to be maintained pursuant to this Clause 8.

8.6 Application of Insurance Proceeds
To the extent that the Airport is damaged and requires repair, rebuilding or reconstruction, then, subject to the Lenders' rights under the Financing Agreements and GoK's rights as a co-insured under the relevant insurance policies, BIAL shall apply any proceeds received by BIAL under any insurances effected pursuant to this Clause 8 towards repairing, rebuilding and reconstructing such facilities at the Airport as are required for the performance of Airport Activities. In the event of destruction or constructive destruction of the Airport to the extent that it would require to be rebuilt completely, and BIAL opts not to undertake such rebuilding, BIAL shall, subject to the Lenders' rights under the Financing Agreements, forthwith utilise the insurance proceeds to repay to GoK the outstanding State Financial Support.

8.7 Co.-insured
BIAL shall, unless otherwise requested by GoK, ensure that GoK is co-insured in respect of any policies BIAL effects pursuant to this Clause 8. If BIAL requires any insurance proceeds for the rebuilding or reconstruction or repair of the Airport and GoK receives any insurance proceeds it shall make these available to BIAL for the rebuilding or reconstruction or repair of the Airport.

9.1.2 Operation Phase
From the Airport Opening Date for the purposes of enforcing its rights under this Agreement, GoK shall have the right to access the Site, provided it gives BIAL reasonable prior notice.

10.3 Equivalent treatment
Post commencement of operations of the Airport GoK shall not act or omit to act in a manner which discriminates against the Airport or BIAL in a way that provides other Major Airports in the state of Karnataka with an unfair competitive advantage when compared to the Airport or BIAL, as the case may be. For the purpose of this Clause, "discrimination" refers only to the passage of administrative or executive orders that are discriminatory in nature in relation to the Airport and/or BIAL vis-a-
vis other Major Airports and/or other airport operators in the State of Karnataka but does not include the passage of laws or administrative or executive orders in relation to fiscal or tax matters. It is clarified that for facilitating the establishment of another Major Airport in the State of Karnataka if the GoK provides concessions or finance, land or other facilitation to establish such other Major Airport the same shall not constitute discrimination for this Clause, provided that this Clause 10.3 shall have no further force and effect from the twentieth (20th) anniversary of the Airport Opening Date.

Schedule 5

Description of the Initial Phase of the Airport

1 Location

The site for the proposed international airport falls east of Bangalore - Hyderabad National Highway No.7 between 29 Kms and 30 Kms from Bangalore and 4 Kms south of Devanahalli town. The site covers an area of 4309.45 acres (1744.01 ha) and is bounded by latitude 13° 15' 50" to 13° 12' 15" N and longitude 77° 40' 20" to 77° 44' 09" East.

The airport layout design allows for a second parallel runway (future) within the site. A separation distance of 1925m between the runways is allowed. This distance allows for a safe independent runway operation in accordance with ICAO guidelines and provides for optimum use of the area between the runways for terminal and other commercial developments.

2 Taxiways

The taxiway system proposed between the runway and the apron will enable aircraft to travel with the minimum of delay and permit the runway to operate to its maximum capacity. In the initial phase the airport taxiway system will include the following:

- Partial single taxiway
- Entry/exit taxiway
- Apron taxi lane.

In the initial phase, the entry/exit taxiways for the runway is proposed at 000m, 2800m and 4000m from 09 threshold, so as to expedite the movement of aircrafts to and from the runway and to reduce taxiing time and distance. With this arrangement only the fully loaded 8747 would back track on the runway 09 before take-off.

3 Apron

The layout of the apron and the terminal and the relationship between the two is designed to reflect international standards.

The objectives of the apron design include:

- To minimise taxiing distance to/from the runway
- To provide sufficient taxi lanes to avoid delays
- To provide airside roads and equipment parking areas so as to ensure that the ground support for aircraft is sufficient and efficient.
• To ensure that operations can be conducted safely.

In the initial phase provision is made for 3 in-contact stands with option to add two contact stands in the future.

4 Airside Service Roads

An airside road system to transport the vehicles, which sustain the operation of aircraft, both on the airside and to link with the landside road system is proposed. An airside service road (apron service road) will run on the airside face of the terminal building. It serves the isolation bay, fire station, cargo, fuel farm, and maintenance area and continues as a gravelled road around the airport perimeter.

5 Main Access Road

A two lane bituminous approach road is proposed, parallel to the runway, linking the NH7 to the terminal complex. A trumpet flyover is also proposed at the intersection of NH7 in order to avoid cross-traffic. The work on trumpet flyover shall be undertaken by NHAI or through a SPV. All roads within the Site will be constructed by BIAL.

This road serving primarily the passenger terminal will also link the airport support facilities. Round about are proposed at important junctions.

From an aesthetic point of view landscaping along the approach road is proposed, to achieve the desired ‘Garden City’ image.

6 Air Traffic Control Tower

The height of control tower proposed is 65 metres. This height will provide a free line of sight of the operational areas and the approaches. The control tower is located on the landside at a distance of 890m from the centre line of the runway.

An ATC complex (Technical Block) with a floor area of approx. 2300 sqm is proposed for air traffic control services not performed in the tower, e.g. approach control. The technical block also houses ATC briefing, Anti-hijacking control room, MET department, electronics work shop, Data management system, library, training rooms and offices.

7 Airfield Lighting

The runway lighting system shall consist of threshold, edge and end lights. PAPI will be installed at both approaches together with CAT I Precision Approach Lighting system.
Taxiway lightning system with elevated omni-directional edge lights will be provided for the partial single taxiway, the exit and entry taxiways and the connections to the apron. Apron floodlighting is provided, to allow for efficient and safe handling of aircraft during night operations. Signage will be provided.

8 Rescue and Fire Fighting Facilities

The airport shall be equipped to provide a level of protection corresponding with aerodrome category IX. The fire station is located such that the response time shall be the lowest to any part of the movement area in optimum Visibility and surface condition. The total area of fire station planned is 1457sqm. A watchtower is located above the fire station.

9 Water Supply

Potable water shall be supplied by Bangladesh Water Supply and Sewerage Board to the service area earmarked on the Master Plan in sufficient quantity and pressure. Potable water storage tanks for an average daily demand for 2 days and raw water storage tanks for one day demand for fire-fighting including distribution networks to the airport facilities shall be constructed. In the initial phase the capacity of potable under ground sump proposed is 4000cum and raw water sump is 1800cum. The water shall be pumped using a hydro pneumatic pumping system.

The potable water will be distributed by means of a land-side main pipeline running in east-western direction, originating in the service area. Separately, a distribution network of similar concept will be provided for fire protection. This network will be equipped with hydrants.

10 Sewage Disposal

The sewerage and storm-water drainage are designed as separate systems. The sewerage system will include a collection network, pump pits, a sewage treatment plant, etc. Sewage water of the airport-related facilities will be collected by means of a landside and an airside main duct running in east-west direction and equipped with man-holes. A sewage treatment plant of 1500 cum capacity will be constructed. The effluent from the sewage treatment plant would be treated and the treated water recycled for horticulture.

11 Drainage

The design of the drainage system is determined by the topography, finished formation levels, surface run-off from paved areas and building roofs. The topographical conditions of the existing surface and, consequently, that of the graded strip of all airport-related facilities, result in a north-south oriented watershed. Open lined drains will be constructed. RCC box culverts or pipe culverts shall be provided beneath pavements.

12 Telecommunications

The telecommunications system will contain an exchange facility and distribution network.
13 Electrical

The power supply to the airport shall be provided by BESCOM/ KPTCL at 66kv level. The main incoming substation will be provided with 2 no 16mva transformers for stepping down 66kv to 11kv. From these transformers the main power system of the airport will be supplied at 11kv level. The electrical power system includes transformer stations, a distribution network, and emergency power supply. The distribution network will be planned with ring mains, so that power supply is always possible from two different sources. An auxiliary power generator system (approx. 6 MVA) is installed in the power station north which will supply the essential consumers of the airport in case of power supply failure.

14 Passenger Terminal Building:

14.1 Layout Concept

The passenger terminal is proposed as single, two level terminal building capable of accommodating international and domestic operations. The arrival and departure are separated vertically with a modern, simple, straight-ahead flow system. The Domestic and International Departure lounges, and the majority of the retail outlets are located on level 2 (first floor). The check-in facilities and baggage reclaim are located in level 1 (ground floor). VIP lounge is located on level 2 (first floor). The entire terminal is designed for ease of operation and for minimum maintenance. The terminal is fully air-conditioned.

14.2 Capacities of the Terminal Building

The terminal building shall be designed for 2017 passengers in the peak hour in the initial development. [The design/standards proposed would reflect the best industry practice and operating standards.] The design would cater for 24 hours operations under all weather conditions. The facilities provided would meet IATA/ICAO standards. The total floor area planned is approximately 55000 m2. Modular expansion of terminal with traffic growth is possible without disturbing the operations and matching the existing façade. The terminal equipment proposed includes:

- In-line X-Ray baggage scanner for hold baggage
- Flight Information system
- CCTV/PA system
- Fire alarm & smoke detection
- Baggage conveyors
- Escalators, Elevators & automatic doors
- Counters for immigration, customs
- Passenger seating/public furniture
15 Fuel Farm

It is essential to provide a storage area for the supply of aviation fuel for the refuelling of aircraft that land at Bangalore. The Master Plan has allocated a space for the fuel farm to the west of the airport site.

Provision of fuel hydrant system to transport fuel from the depot to the aircraft shall be included in the concession agreement with the supplier.

In the initial phase as the rate of aircraft movement is not very high and the fuel requirements not very great, combination of fuel hydrant and fuel tanks for remote stands, would be used to refuel the aircraft.

16 Terminal Parking

In the first phase of development car park in front of the terminal building at ground level is planned. The location would be convenient for passengers and visitors to the airport. Separate zones for pick-up and drop off are earmarked. Parking for private cars, taxis, staff car, staff vehicles, VIP cars and WIP cars provided.

17 Administration Building

A separate administrative building to house the offices for airport management, aircraft operators, security and staff canteen is planned adjacent to the technical block on the land side. The total area of the administrative block planned is 3000sqm.

18 Maintenance Building

Maintenance facilities are required for airport vehicles, electrical & mechanical equipment and for other uses. The maintenance facility would include storage space for materials and spare parts. The space provided for this facility is 2190sqm.

19 Ground Equipment Maintenance Area

The ground equipment used on the apron is bulky and unsuitable for use on normal roads. A GSE maintenance area is planned on the air side. The GSE building measures an area of approx. 2000sqm.

20 Security Wall

The security wall or security fence separating the land side and air side facilities will be constructed according to BCAS specifications. In addition a boundary wall will also be constructed to protect the BIAL property.
